

Denials Management

Revenue Integrity

Outsmart AI denials with expert-driven AI appeals

Smart Denials, Smarter Appeals

Payers are using AI to deny claims faster than ever, hitting your revenue hard—especially with complex DRG and patient-type downgrades.

We've got your back. We combine powerful AI with expert teams to overturn denials. Our Best-in-KLAS approach recovers more revenue—faster.

Cutting-Edge Technology

Compass, our proprietary AI platform, analyzes medical records and contracts to build evidence-based appeals.

Right Expert, Right Denial

We match every denial with the perfectly paired expert—whether it's legal, clinical, or technical.

Strategic AI Investment

We invest strategically in AI technology to prove medical necessity and secure rightful payments.

Dedicated Account Management

Your dedicated success director drives results through support, training, and data-driven insights.

Unmatched Expertise

Our team gets denials overturned, rapidly—180+ legal, 80+ clinical, 900+ claims specialists, and 35+ AI engineers.

Elite Data Security Standards

Your data security is safeguarded through our HITRUST Risk-based, 2-year (r2) Certification.

"I would recommend the firm because of the fact that they work closely with us, implement things, collaborate, have the right skill sets, and speak to us at our level.

They understand the nuances of the workflow, so I like that I don't have to explain to someone what something is and where to go; they already know that."
