

Veterans Affairs TRICARE

Complex Claims

Simplify VA & TRICARE claims
and boost your bottom line

Fast Track Collections With Ease

Managing VA and TRICARE claims is no walk in the park—the paperwork's a pain, rules are tricky, and payments often run low. Chasing these payments can feel like too much hassle.

Advanced Proprietary Technology

Through advanced automation and integration, our Compass platform streamlines VA claims.

Prompt Investigation & Notification

We spot all possible payers and notify the VA within 72 hours of emergency care—maximizing payment.

Military-Connected Experts

Military service is core to our identity—many of our team members are veterans or from military families.

We make it simple. Our tech and expert team handle everything: system integration, regulations, and even the toughest cases—enabling your team to prioritize high-impact initiatives.

Specialized VA Claims Education

We equip your team with VA and TRICARE training—from eligibility to authorization protocols.

Dedicated Account Management

Your director aligns with our attorneys, clinicians, and claims specialists to drive optimal outcomes.

Excellence from Day One

We drive VA and TRICARE claims success from day one—accelerating yield and maximizing revenue.

"Aspirion does a great job. They are definitely experts in their field. The VA is a very complex payer with a lot of rules and guidelines, and it is always evolving and changing and getting more restrictive, but Aspirion stays on top of the changes."

The government doesn't want to pay and is hard to work with. The firm does a fantastic job of staying on top of nuances. Additionally, I am highly satisfied with how the firm performs in motor vehicle accidents. They do a great job with filings and everything. They also have great reports."
