Contract IQ

Meet ContractIQ

The AI Powering Our Payment Variance Recovery Services

Millions lost to payer errors, contract complexity, and manual systems too slow to keep pace.

The solution. Our team uses ContractIQ—our proprietary AI platform—to extract payer contract pricing rules and reference data at scale, uncovering hidden revenue with complete accuracy so you get paid what you're owed.

Uncovers Hidden Revenue	Scales Contract Intelligence	Does The Heavy Lifting

Surfaces every dollar you're missing with precision. ContractIQ extracts contract terms at scale and applies payer policies and CMS guidelines to identify payment variances, validated by our team of US-based experts.

Models and prices claims with complete accuracy at unlimited scale. ContractIQ continuously updates rules across government, commercial, and inpatient & outpatient care—turning underpaid and zero-balance accounts into recovered revenue.

Replaces outdated manual processes with AI-powered accuracy. Contracts are too complex and claim volumes too high for manual SQL-based modeling. ContractIQ identifies hidden revenue with accuracy and speed legacy systems can't match.

Contract complexity solved. Precise pricing at scale. Accelerated revenue recovery.

1 Extract

Ingests managed care contracts using Large Language Models (LLMs), extracting payment rules without human intervention.

2 Model & Price

Combines those rules with external data—payer policies, CMS guidelines, and industry standards—to accurately price claims.

3 Identify

Identifies high-value payment variances and filters out claims that aren't worth your time. Real-time updates. Accuracy at scale.

4 Recover

Converts identified zero-balance and underpaid accounts into maximum dollars via auto-generated appeals, fast.
