

# Veterans Affairs

## Claims Management

Aspirion not only boosts Veterans Affairs revenue but helps improve the healthcare experience for our nation's veterans for these reliably tedious, time-intensive, and complicated claims.

## Why Choose Us

With a consistent Veterans Affairs **success rate of over 90% and days to pay averaging 42 or fewer** for our established partners, we're proven experts at combating roadblocks and resolving reimbursement.

"Sometimes the VA and the automatic liability areas can drag on, and Aspirion really helps us with those. **They specialize in the VA**, and that helps us tremendously because I don't have someone here that I can have work strictly with VA clients. In terms of time, **Aspirion is a huge help for us**. And of course, they do **draw in revenue** because they are able to work claims and accounts **more diligently than we are able** to because of the volume that we do."

**Manager, Aspirion Veterans Affairs Client**

## Prescriptive Implementation

Grounded in 8 key milestones and tailored to your specific needs, our prescriptive implementation drives high performance via single ownership accountability.

## Exhaustive Investigation

We identify all possible payers for each account, including first-party automobile coverages (medical payments and personal injury protection), health insurance, and auto liability insurance.

## Tailored Staff Education

We educate and train client teams on VA eligibility, COB, ER notification compliance, verification methods, auth requirements and more—all tailored to you.
