

Underpayment Recovery

Claims Management

Whether you're tasked with complex managed care contracts or high managed care volume, Aspirion's tech-enabled underpayment support ensures no money is left on the table.

Why Choose Us

We not only recover accurate lost revenue from underpayments, but we also help streamline your revenue cycle management processes to minimize total AR, zero balance accounts, and credit balances and improve your financial position.

"The Aspirion experience and expertise in revenue cycle under Managed Care contracts was invaluable for our team. They had a **great deal more success on our Managed Care 'zero balance' accounts than any other vendor** that we have ever used.

The Aspirion **contingency-based pricing showed the confidence** they have in their work."

Vice President, Revenue Cycle
Aspirion Underpayment Recovery Services Client

Proprietary Technology

Our proprietary technology is a key factor in our underpayment recovery success—enabling us to systematically manage and model payer payment variance.

Process Improvement

We provide extensive reporting and detailed documentation by facility, payer, and reason code, including payer, contract, and facility issue feedback to support future negotiations and improved AR processes.

Contingency Fee Model

With our contingency-based model, we only get paid when you get paid.
